ABOUT BLOODIRONY

Bloodirony is a small Vienna based game studio fully dedicated to creating mobile indie games. Our heart beats for music, food, mobile technology and most importantly for unicorns. The ultimate goal of our mission to eradicate boredom is nothing less than to save mobile gaming.

ABOUT SHOOTING STARS

Shooting Stars is a mobile roguelike shoot 'em up from the Vienna based indie studio Bloodirony Games. It's all about evil aliens, superstars, cats and rainbow lasers.

Aliens have secretly conquered the earth and replaced all the famous pop-culture superstars by installing evil marionettes serving one purpose only – to control all human life. The sacred rainbow unicorn made it your mission to free the imprisoned stars, fight back the evil aliens and restore the balance of entertainment on planet earth.
